PROFESSIONAL SUMMARY

IT and technical support professional with 3+ years of experience providing frontline and escalated support across ticketing, financial services, and healthcare environments. Skilled in systems monitoring, incident troubleshooting, root-cause analysis, and maintaining platform uptime and data accuracy. Experienced with CRM and case-management platforms (Salesforce, Genesys), relational databases (PostgreSQL), and ticketing systems, with a strong record of using automation (Python, SQL, n8n) to speed up resolution times and reduce recurring issues. Comfortable working independently, documenting processes, and handling confidential data with care.

CORE SKILLS

Technical Support & Troubleshooting: Incident diagnosis, root-cause analysis, escalation management, uptime & performance monitoring, workflow monitoring

CRM & Support Platforms: Salesforce CRM, Genesys, ticketing systems, case management

Databases & Systems: PostgreSQL, SQL, data validation, REST APIs, Docker, Git/GitHub, Vercel

Automation & Tooling: Python, n8n, Selenium, Playwright, Google Sheets automation, Excel

Other: Process documentation, reporting, quality & compliance standards, remote and independent work

Creative Tools: Canva, Adobe Illustrator, Adobe Photoshop, CapCut, ChatGPT / AI creative tools, Higgsfield

PROFESSIONAL EXPERIENCE

Technical Support Specialist **Aug 2025 – Oct 2026**
Ticketshop — Dubai, UAE

- Monitored ticketing platforms and operational systems, identifying and resolving issues to maintain uptime and performance
- Troubleshot operational and system-related issues end-to-end, escalating complex cases when required
- Tracked order workflows and investigated missing, pending, or inconsistent records to keep systems accurate
- Maintained and validated structured databases to ensure data integrity across support tools
- Built automation scripts in Python and SQL to cut down repetitive manual troubleshooting and reporting work
- Designed n8n workflows to automate data syncing, alerts, and notifications across support systems
- Developed internal monitoring and reporting tools that gave the support team earlier visibility into issues

Senior Associate, Customer Support (Healthcare Account) **May 2024 – June 2025**
WNS Global Services

- Provided frontline technical and account support to healthcare customers via phone and email
- Diagnosed and resolved account inquiries, documentation issues, and service requests
- Maintained and updated customer records across multiple internal systems
- Managed high-volume support interactions while meeting strict quality and compliance standards
- Coordinated with internal teams to troubleshoot and resolve escalated customer concerns

Customer Service Representative / Sales Associate **May 2022 – April 2024**
Foundever

- Delivered customer and technical support for financial services accounts, resolving inquiries and account issues
- Used Salesforce and Genesys daily to log, track, and resolve customer cases
- Handled high call volumes while maintaining service quality and performance metrics
- Recommended products and services as part of issue resolution, contributing to sales performance

RELEVANT TECHNICAL PROJECTS

Ticketing Operations Automation (Independent Project)

- Built automation tools with Python, Selenium, and Playwright to reduce manual work and errors across ticketing platforms
- Added data validation and monitoring scripts to catch issues early and improve operational workflows

Operations Dashboard & Internal Tools (Independent Project)

- Built internal utilities for reporting, workflow monitoring, and database management
- Wrote SQL queries and automation scripts to improve day-to-day operational efficiency

BudgetFlow — Personal Finance Web Application

- Built a full-stack web app (Next.js, React, TypeScript, PostgreSQL) with role-based access control, showing end-to-end systems and database experience

EDUCATION

Bachelor of Science in Computer Science
